Reasons for Allowance

1. Claims 1-12 are allowed as the prior art does not teach or suggest the applicant's invention. Independent claims 3-4, 7, and 9-12 teach a magnetic disk apparatus and servo signal recording method. The distinguishing elements of the claims are: a control unit for writing a servo signal into the specific range at servo track movement pitch based on servo tracks recorded with the servo signal, correcting the servo track movement pitch on the basis of the number of servo tracks in the specific range and executing control to write the servo signal at corrected servo track movement pitch; wherein, if a result of comparison of the number of servo tracks recorded with the servo signal in the specific range with a predetermined value indicates that the number of servo tracks is greater than the predetermined value, the servo track movement pitch is increased and a servo signal is recorded onto areas outside the specific range at the increased servo track movement pitch.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitchell R Slavitt whose telephone number is (703) 305-2809. The examiner can normally be reached on M-F (6:30-4:00), 2nd Friday off.
